Docket No. 70-1113
License No. SNM-1097

General Electric Company
ATTN: Mr. T. Preston Winslow, Manager
Licensing and Nuclear Materials
Management, M/C J88
P.O. Box 780
Wilmington, North Carolina 28402

Gentlemen:

We have reviewed your letter dated October 20, 1989, regarding the planned modification to the existing calcium fluoride (CaF₂) treatment operation. The proposed process improvement involves the installation of: (1) two steam-jacketed dryers under the existing CaF₂ filter press, (2) a water-type scrubber to remove dust from the dryer offgas, and (3) compartment-type conveyors to transfer the dried CaF₂ sludge from the dryers to the transport trailer.

Our review has concluded that no licensing action is necessary for this planned modification.

Your cooperation in keeping us informed of your activities is appreciated.

Sincerely,

Original Signed By:
