

SEP 10 1976

50-269

MEMORANDUM FOR: William P. Gammill, Assistant Director for Site Technology, DSE

THRU: J. C. Stepp, Chief, Geology and Seismology Branch, DSE
R. B. Hofmann, Leader, Geology Section, GSB, DSE

FROM: Robert E. Jackson, Geologist, Geology Section, GSB, DSE

SUBJECT: OCONEE/JOCASSEE DAM MEETING

A meeting has been tentatively scheduled for September 21, 1976 to discuss geology and seismology and foundation engineering aspects of the Jocassee Dam and local seismicity. It would be useful to invite the participation of the Federal Power Commission in this meeting. They oversee construction and operation of such dams and have examined the Jocassee Dam. We have had informal telephone conversations with Mr. H. Thomas of that organization in the past regarding the Jocassee Dam.

Since this meeting requires the involvement of another agency, we believed that an invitation to attend the meeting should be initiated at the A/D level or higher.
