MEMORANDUM FOR: Victor Stello, Jr., Acting Assistant Director for

FROM: Robert L. Baer, Chief, Reactor Safety Branch, DOR
SUBJECT: OCONEE 1, 2, and 3 PROPOSED SAFE SHUTDOWN FACILITY
(TACS 7274)

PLANT NAME: Oconee 1, 2, 3
DOCKET NOS.: 50-269, 50-270, and 50-287
PROJECT BRANCH: ORB-4
PROJECT MANAGER: M. Fairtile
REVIEW BRANCH: Reactor Safety
REVIEW STATUS: Waiting

Attached are the Reactor Safety Branch's preliminary questions on the proposed Oconee Safe Shutdown Facility. Since the facility is in the conceptual planning stages, these questions are considered indicative of the type of information our branch needs to evaluate the final design. We understand that these questions, along with other sets of questions from various branches within NRC, will be coordinated and edited by M. Fairtile (NRC) prior to being sent to Oconee.

The combined questions will therefore serve to establish the minimum scope of the formal SSF submittal.
