

AUG 24 1977

Docket Nos.: 50-269/270/287

MEMORANDUM FOR: A. Schwencer, Chief, Operating Reactors Branch No. 1, DOR

FROM: J. T. Collins, Chief, Effluent Treatment Systems Branch, DSE

SUBJECT: ACCEPTANCE REVIEW OF THE ADDITIONAL APPENDIX I INFORMATION FOR OCONEE, UNIT NOS. 1, 2, AND 3

We have reviewed the information submitted June 4, 1976, and an informal response that the ORPM received from the licensee in response to our request of August 4, 1976, for information needed for our Appendix I evaluation. The information submitted will enable the ETSB to perform its evaluation. The meteorological information provided to the ETSB, however, is sufficient only for a conservative evaluation to determine conformance with the requirements of Appendix I. If we find that Oconee, Unit Nos. 1, 2, and 3 do not conform with the requirements of Appendix I, additional meteorological information may be needed from the licensee.

Therefore, at this time, the licensee has provided sufficient information to permit evaluation, on a conservative basis, of Section II.D under the Annex to Appendix I of 10 CFR Part 50, and the need for additional information will depend on the results of our evaluation.
