

OCT 6 1975

Docket Nos. 50-269, 270, 287

K. Goller, Assistant Director for Operating Reactors, RL

TAR- 1792, REVIEW OF WASTE MANAGEMENT FACILITY SAFETY ANALYSIS REPORT,
OCONEE UNITS 1, 2 & 3

We have reviewed the above report and find that we need additional information to complete our review. As-built piping and instrument diagrams (P&ID's) of the modified radwaste systems and pertinent radwaste system operational data, as identified in the enclosure, need to be provided so that we may evaluate the facility modifications to determine whether we concur with the licensee that no unreviewed safety questions are involved as defined in 10 CFR 50.59.

Robert L. Tedesco, Assistant Director
for Containment Safety
Division of Technical Review

Enclosure: As stated
