MEMO TO FILES

Mr. W. S. Lee, Duke Power Co., called me today regarding a meeting scheduled for next week on the inspectability of vessels. He wanted to know if this meeting was open to the utility people. I told him we wanted to talk to the people who designed and built the vessels first and get their practical reaction and then we would talk to the utility people. I assured him that our intent was not to exclude but to take it ~~in~~ in bits and for this reason the utilities, who obviously are just as interested, have not been invited to this meeting. I also told Mr. Lee that we wanted to keep the meeting to a size where we can do something useful. Mr. Lee said he understood and asked that we give him a call later on.
