JUL 10 1972

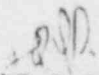

Note to File

TELECON BETWEEN KULYNYCH (B&W), CANADY (DUKE), SCHWENCER AND PELTIER -  
JULY 7, 1972

B & W will issue three topical reports on the Oconee damage and repair problem. The first topical due the first or second week in August will present the results of the damage investigation and assessment. The second topical due the third or fourth week in August will present re-design of the reactor components. The third topical due the first or second week in September will present vibration monitoring and loose parts detection system to be used on Oconee I.

B & W requested a meeting to brief us on the instrumentation system to be used in Oconee I. The meeting has been set for August 7, 1972.

The above reports and meeting will be covered by Mechanical Engineering Branch under our existing technical assistance request, dated April 26, 1972.
