

MAR 29 1972

E. G. Case, Director  
 Division of Reactor Standards

TECHNICAL ASSISTANCE

Per discussions with Ray Maccary technical assistance is requested from DRS to determine the extent of engineering review required in connection with the B&W proposed modification of the prototype Oconee Unit 1 steam generator which suffered major damage during recent hot functional tests.

The first step in this assistance will be to provide DRS representation at the April 6, 1972 meeting to be held at Barberton, Ohio. (See meeting announcement and agenda dated March 28, 1972).

Original Signed by  
 Peter A. Morris
