D. Muller, Assistant Director for Environmental Projects, DREP

OCONEE REALISTIC ACCIDENT ASSESSMENT

Enclosed is a mark-up of the Accident Assessment Section for the Oconee final Detailed Statement. There are a number of minor revisions to the dose table due to a refinement of the dose calculations performed by E. Adensam. However, our opinion that the environmental risk remains extremely low is not changed.

Brian Grimes, Chief
Accident Analysis Branch
Division of Reactor Licensing
