NOTE TO FILES

TELECON WITH KEN CANADY, DUKE POWER COMPANY

Canady called to inform me that the company which has been providing Duke with the anti-corrosion lubricant for the containment tendons is not producing the product any longer. (No - Ox - Id (R) 500, Dearborn Chemical Company) See FSAR Section 5B 2.4.2. Therefore, for Unit 3 a substitute product, Visconorust 1601 manufactured by Viscosity Oil Company is being used.

The FSAR will be updated when Duke submits its next amendment.
