R. C. DeYoung, Assistant Director for Pressurized Water Reactors, DRL  
THRU: A. Schwencer, Chief, Pressurized Water Reactors Branch No. 4, DRL

TELECON WITH RDT REGARDING OCONEE 1 STEAM GENERATOR DAMAGE

On March 23, 1972, I was called by Merrill Whitman and Marshall Roy of RDT, Germantown. They wanted to know what had happened at Oconee.

I told them that our information was sketchy having been received by telephone and that we had no written reports as yet from the applicant or Compliance.

I filled them in on the discovery of damage to the steam generator and the discovery of guide tube failure in the vessel but said that cause, extent and impact of these things are unknown at this time.

I. A. Peltier, Project Leader
