NOTE TO C. W. KUHLMAN

DEFICIENCIES IN NON-RADIOLOGICAL TECHNICAL SPECIFICATIONS

Please note the attached memorandum from Region II on the above subject dated March 28, 1974.

As discussed in the Region II memorandum, the Oconee Non-Radiological Environmental Technical Specifications appear to lack enforceable reporting requirements. Violations on specific requirements on environmental matters are being reported only via the semiannual report. Please inquire into this matter with Licensing to determine the real intent of the Non-Radiological Environmental Technical Specifications issued for the Oconee plant.
