Oconee Nuclear Station
Security Plan, Revision 1

We have reviewed the Oconee Nuclear Station Security Plan, Revision 1 (12/26/72) and find that deficiencies previously identified still exist. Our concerns are as follows:

<u>Section</u>	<u>Concern/Deficiency</u>
3.3	Locate on Drawing 0-3 the location of the CCTV for the intake structure.
3.3	Does the phrase "locked exterior doors on the west side of the station" include the several shipping and receiving doors, and the two fuel transfer area doors? The security measures for these doors are not shown on Figure 1-5.
- 3.3	Provide locks on the two main doors to each of the two control rooms (Figure 1-7).
3.3.1	Provide for the surveillance of vital equipment and facilities inside the vital area boundary by operating personnel. See ANS 3.3, Draft 4, Subsection 3.4.3.
4.4	State the average time required for the Oconee County Sheriff's Department to respond to a request for assistance.
