

JAN 17 1973

D. Knuth, Assistant Director for Reactor Safety, Directorate of Licensing  
OCONEE ECCS - FLOODLINE BREAK

The applicant (Duke through B&W) has submitted a letter report, dated January 15, 1973 providing its analysis of the postulated floodline break accident for Oconee Unit 1.

We will need your final evaluation of this information prior to March 1, 1973 in order to complete our Oconee Station SER supplement in accordance with Blue Book Schedules. However, since we intend to license Oconee 1 on February 2, 1973 we need information within the next few days to use as the basis for tentative Technical Specification limits on the operation of Oconee Unit 1. In particular, what power limits and what plant modifications will be required at some time in the future?
