

ENCLOSURE 2

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

JAN 17 1975

Docket No. 50-346

The Toledo Edison Company  
Attn: Mr. Lowell F. Roe  
Vice President, Facilities  
Development  
300 Edison Plaza  
Toledo, Ohio 43652

Gentlemen:

Three copies of the revised draft Standard Technical Specifications (STS), developed for use in nuclear plants employing Babcock and Wilcox (B&W) nuclear steam supply systems, are forwarded for your review with regard to Davis-Besse Unit 1 application. The initial objective of your review is to provide detailed comments and recommendations for further development of the B&W-STS. As suggested by Mr. Joel Rodgers of the Florida Power Corporation, we believe that it would be beneficial for B&W and the lead utilities whose Technical Specifications are to be converted to the B&W-STS to exchange and discuss applicable review comments and present these combined comments to the Regulatory Staff. The lead utilities are Florida Power Corporation (Crystal River, Unit 3), Metropolitan Edison Company (Three Mile Island, Unit 2) and Toledo Edison Company (Davis-Besse, Unit 1). Copies of this revised draft B&W-STS have been sent to B&W and the other lead utilities mentioned above. For your information, we are enclosing the summary of a December 13, 1974 meeting held with B&W and Metropolitan Edison Company on this subject.

Mr. Robert Battimore has been designated as the Regulatory Staff's principal coordinator for the B&W-STS and may be contacted by phone (301-973-7741) to coordinate the overall review on this matter.

Enclosed Signed by

A. Schwencer, Chief  
Light Water Reactors Branch 2-3  
Directorate of Licensing
