Docket No. 50-346

MAR 10 1975

The Toledo Edison Company
 ATTN: Mr. Lowell E. Roe
 Vice President, Facilities
 Development
 300 Edison Plaza
 Toledo, Ohio 43652

Gentlemen:

As a result of our review of the Industrial Security Plan for the Davis Besse Nuclear Power Station, Unit 1, we are submitting the following NRC staff positions and requests for additional information. The positions are listed in Enclosure 1. We request that you state your intent regarding compliance with each of these positions and amend your Industrial Security Plan accordingly.

We have requested in Enclosure 2 additional information needed to clarify and amplify previously submitted information.

In order to maintain our licensing review schedule for those matters dealt with in the enclosures, we will need adequate responses by April 11, 1975 to all staff positions and requests for information. The responses should be provided in the form of page changes to your Industrial Security Plan (four copies required). Identify on the submitted pages, with a marginal mark and revision number, those portions of the text which have been revised.

Please inform us within seven days after receipt of this letter of your confirmation of the schedule date or the date you will be able to meet. If you can not meet our specified date or if your reply is not fully responsive to our request, it is highly likely that the overall schedule for completing the licensing review for this project will have to be extended. If you plan to appeal to Licensing management on any of the positions listed in Enclosure 1, please advise us of your intentions within two weeks.
