

DEC 15 1972

Docket No. 50-346

J. Hendrie, Deputy Director for Technical Review, Directorate of Licensing  
A. Braitman, Chief, Office of Antitrust & Indemnity

**TOLEDO EDISON COMPANY - DAVIS-BESSE NUCLEAR POWER STATION**

Toledo Edison Company submitted its application for an operating license for the Davis-Besse Nuclear Power Station on December 12, 1972. In accordance with the "Guide for the Preliminary Review of Facility License Applications", a schedule for conducting the preliminary review is provided as Attachment 1. This schedule is extremely important in the review because of the requirement by AEC Rules to complete the entire review in 30 days. A coordination meeting of all review participants will be held on December 20, 1972, as noted in Attachment 2.

The FSAR for this application was prepared in accordance with and should be judged for completeness on the basis of the "Standard Format and Content of Safety Analysis Reports for Nuclear Power Plants" dated February 23, 1972.

For all review participants we request 1) that you attend the coordination meeting on December 20, 1972 and 2) that comments be provided to the Project Manager (H. Faulkner) no later than January 3, 1973.
