Reactor Inspection and  
Enforcement Branch  
Division of Compliance

TOLEDO EDISON COMPANY (DAVIS-BESSE) - DOCKET NO. 50-346

The enclosed report of the management meeting conducted subsequent to the initial quality assurance inspection is transmitted for information. Compliance found the applicant responsive to the comments made. We continue, however, to have concern about the timeliness of program development and the adequacy of manning.

We will pay particular attention to these matters in our continuing inspection program.
