

JUL 14 1970

J. P. O'Reilly, Chief, Reactor Inspection and Enforcement Branch
Division of Compliance

TOLEDO EDISON COMPANY (DAVIS-BESSE) - DOCKET NO. 50-346

The enclosed report of the initial QA inspection of the subject facility is transmitted for information. Compliance found that the applicant has developed and placed in effect a quality assurance program which conforms to Appendix B to 10 CFR 50, and the commitments in the application.

Present manning is minimal, although apparently adequate for the current status of the project. Additional personnel are to be assigned on what appears to be a realistic schedule. Compliance will examine this subject during the continuing inspection program.

J. B. Henderson
Senior Construction Engineer
Division of Compliance
