

MAR 30 1970

Roger S. Boyd, Assistant Director for Boiling Water Reactors, DRL
ACRS SUBCOMMITTEE FOR DAVIS-BESSE (DOCKET NO. 50-346)

On March 26, 1970 Jim Hard (ACRS Staff) indicated to me that the Davis-Besse Subcommittee chairman (Dr. Siess) plans on recommending to the full Committee at the April meeting the following courses of action:

1. General

- a. Within one week prior to the final ACRS Subcommittee meeting, all DRL consultants' reports and the DRL report must be submitted to the Committee.

Without the reports, the Subcommittee meeting may be cancelled. In any case, if the reports are not submitted within three days, then the meeting will be cancelled.

- b. The Subcommittee chairman will not recommend that the project be taken for the full Committee's consideration until all unresolved items are documented by the applicant and DRL has reviewed the information. Thus, the unresolved items of both sides of issues must be documented by the applicant and by DRL.
- c. All reports must be in to the ACRS two weeks prior to the full Committee meeting.

2. Site Visit

- a. A report will not be necessary for a site visit; however, Jim Hard indicated that it would be desirable to have a list of site-related problems for the review of the Subcommittee at the time of the site visit.
- b. In the event that a list is not available, the site visit could take place; however, the applicant should be prepared to brief the Subcommittee on what he plans to show and state why he is doing this. The applicant should also have hand-outs of the presentation available for the Subcommittee.
