Frank Congel, Leader, Radiological Impact Section,
Radiological Assessment Branch, DSE

METEOROLOGICAL INPUT TO DAVIS BESSE, UNITS 1, 2, & 3

On August 8, 1976 we gave R. Emch, of your section, the appropriate computer printout and cards for your Appendix I dose assessment. This input is based on onsite meteorological data collected between August, 1974 and August, 1975, points of interest information received from RAB in July, 1976, and release point data received from ETSE on July 1, 1976. J. Fairbent and Mark Green of my section prepared this input.
