Docket No. 50-346

Toledo Edison Company
ATTN: Mr. Lowell E. Roe
Vice President
Facilities Development
Edison Plaza
300 Madison Avenue
Toledo, OH 43652

Gentlemen:

This refers to the inspection conducted by Messrs. C. C Williams, D. W. Hayes, F. Jablonski and K. R. Naidu of this office on February 9-11, 1977, of activities at Davis-Besse Nuclear Power Station, Unit 1, authorized by NRC Construction Permit No. CPPR-80 and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

As discussed with you during the exit meeting and subsequently on the telephone on February 15, 1977 we understand you plan to obtain further assurance from the Babcock and Wilcox Company (B&W) that the Velan valves and high pressure injection pumps meet specification requirements.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room, except as follows. If this report contains information that you or your contractors believe to be proprietary, you must apply in writing to this office, within twenty days of your receipt of this letter, to withhold such information from public disclosure. The application must include a full statement of the reasons for which the information is considered proprietary, and should be prepared so that proprietary information identified in the application is contained in an enclosure to the application.
