MEMORANDUM FOR: D. Vassallo, Assistant Director for Light Water Reactors, PM  
FROM: Donald J. Skovholt, Assistant Director for Quality Assurance & Operations, PM  
SUBJECT: UPDATED SAFETY EVALUATION REPORT: DAVIS-BESSE NUCLEAR POWER STATION, UNIT NO. 1, QUALITY ASSURANCE

Applicant: Toledo Edison Company (TE)  
Licensing Stage: OL  
Responsible Branch: LWR #4  
Project Manager: L. Engle  
Requested Completion Date: August 30, 1976  
Review Status: Supplement to SER complete

We have reviewed and evaluated the operational QA program described in Section 17.2 of the FSAR for Davis-Besse Nuclear Power Station, Unit No. 1. The enclosed updated SER reflects our evaluation of the FSAR thru Revision 20, and thus supersedes the previous version forwarded by my memo dated February 7, 1975.

We conclude that the QA program as described in Section 17.2 of the FSAR, thru Revision 20, is acceptable for the operations of Davis-Besse, Unit No. 1.

Original Signed by  
Donald J. Skovholt
