

JAN 26 1977

Docket No. 50-346

MEMORANDUM FOR: J. Stolz, Chief, Light Water Reactors Branch No. 1

FROM: C. J. Heltemes, Jr., Chief, Quality Assurance Branch, PM

SUBJECT: DAVIS-BESSE NUCLEAR POWER STATION, UNIT NO. 1 - REVISION NO. 26 TO FSAR

We have evaluated Section 17.2 of Revision No. 26 to the FSAR for Davis-Besse Nuclear Power Station, Unit No. 1. We find that this revision does not degrade the quality assurance program previously accepted (Skovholt/Vassallo, August 30, 1976 memo transmitting updated SER for Section 17.2) and that quality-related activities are to be controlled in accordance with the requirements of Appendix B to 10 CFR 50.

We conclude that the QA program as described in Section 17.2 of the FSAR, through Revision 26, is acceptable for the operations of Davis-Besse, Unit No. 1.
