MEMORANDUM FOR: T. A. Ippolito
FROM: Joseph M. McGough, STS Group Leader, Division of
Operating Reactors
SUBJECT: DAVIS-BESSE, UNIT 1

Enclosed is a revision of Section 3/4.3 of the Proof and Review Copy of the Davis-Besse, Unit 1 Technical Specifications that are tentatively scheduled for issuance as Appendix "A" of the Operating License for this facility on or about March 1, 1977. These specifications have been generated from the June 1, 1976 revision of the Babcock and Wilcox Standard Technical Specifications with minor modifications as necessary to accommodate plant specific design features.

The Davis-Besse, Unit 1 reviewer should examine this document to ensure the accuracy and completeness of the specifications. Comments should be provided to L. Engle - LWR Branch No. 1 (Ext. 27791) and J. Roe - STS Group (ext. 27306) by February 7, 1977 in order to allow sufficient time for resolution and incorporation prior to issuance.
