Docket No. 50-346  
November 30, 1976  
Serial No. 162

Director of Nuclear Regulation  
Attn: Mr. John F. Stolz, Chief  
Light Water Reactors Branch No. 1  
Division of Project Management  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Stolz:

Your letter of November 16, 1976, transmitted the NRC summary of the licensing staff site visit to Davis-Besse Nuclear Power Station Unit 1 on October 6, 7 and 8, 1976. You also requested that the FSAR be amended to conform with stated resolutions to NRC concerns, and that we respond by November 30.

On November 24, 1976, we informally identified to Mr. L. Engle, Licensing Project Manager, by marked copy of your summary enclosure where in the FSAR the subject resolutions may be found. The marked summary identified that all but the following have been addressed in FSAR revisions thru Revision 23. Revision 23 was submitted on November 23, 1976. Revision 24, expected to be submitted the week of December 6 will address:

- Item 5
- Item 11, second paragraph
- Item 14
- Item 15

As mentioned above, the remaining items have been addressed in previous revisions or required no responses.

Yours very truly,
