 SPECIFICATIONS (PROOF AND REVIEW COPY DATED  
 SEPTEMBER 24, 1976)

Plant Name: Davis-Besse Unit No. 1  
 Supplier: Babcock & Wilcox; Bechtel  
 Docket Number: 50-346  
 Responsible Branch and Project Manager: LWR 1; L. Engle; STS Group: J. Roe  
 Licensing Stage: OL  
 Reviewer: J. Halapatz  
 Requested Completion Date: October 26, 1976  
 Description of Task: Technical Specification Review  
 Review Status: Complete

The Metallurgy Section of the Materials Engineering Branch, Division of Systems Safety has reviewed Section 3/4.7.1.6, "Secondary Water Chemistry" and Section 3.4.7, "Reactory Coolant System - Chemistry," of the Technical Specifications for Davis-Besse Unit No. 1. The review was made in response to the letter, Joseph M. McGough, STS, to S. S. Pawlicki, DSS, et al, dated September 24, 1976.

The Metallurgy Section finds Sections 3/4.7.1.6 and 3.4.7 in conformance with NUREG-0103, "Standard Technical Specifications for Babcock and Wilcox Pressurized Water Reactors," Revision of June 1, 1976.
