

Docket No. 50-346

OCT 21 1971

Mr. Harry R. Johnson  
Ottawa County Courthouse  
Port Clinton, Ohio 43452

Dear Mr. Johnson:

In an effort to be more responsive to the needs of the public the Atomic Energy Commission has established locations where members of the public can inspect documents relating to applications currently under review by the regulatory staff for construction permits and facility licenses. These locations are near the site of the proposed nuclear plant and, for the most part, are in public libraries, thereby providing easy access to the public.

The Commission currently has pending an application filed by the Toledo Edison Company for the Davis-Besse Nuclear Power Station. The address of the local public document room for this project is:

Ida Rupp Public Library  
Port Clinton, Ohio 43452

You may wish to refer members of the public who contact your office to this location where they can review the application and other related documents.

Sincerely,

Original Signed by  
R. C. DeYoung

Richard C. DeYoung, Assistant Director  
for Pressurized Water Reactors  
Division of Reactor Licensing
