 Development Department  
 P. O. Box 1001  
 Columbus, Ohio 43215

Dear Mr. Williams:

I am forwarding for your information and use one copy each of Amendment Nos. 8, 9 and 10 to the facility license application for the proposed Davis-Besse Nuclear Power Station.

Amendments 8 and 9 both consist of revised pages for the Preliminary Safety Analysis Report, Amendment 8 to reflect changes necessitated by the applicants' plans to use a closed cycle cooling tower system with the facility, and Amendment 9 to reflect a change in the pipe protection criteria. Amendment 10 contains updated financial data and includes revised estimated construction cost figures.

I am also enclosing a copy of a report to the Commission from the Advisory Committee on Reactor Safeguards, dated August 20, 1970. This report relates to the Committee's review of the application filed by The Toledo Edison Company and The Cleveland Electric Illuminating Company for a permit to construct the Davis-Besse Nuclear Power Station on the applicants' site on the southwest shore of Lake Erie, in Ottawa County, Ohio.

Sincerely yours,

Original signed by  
 F. Schroeder
