Dr. Richard Demming
Battelle Columbus Laboratories
505 King Avenue
Columbus, Ohio 43201

Dear Dr. Demming:

Enclosed you will find one copy of the Technical Specifications for the Davis-Besse Nuclear Power Station Unit 1 for use in connection with Battelle's contract to apply WASH-1400 insights to the NRC inspection and enforcement program. This plant was chosen because it has recently developed, standard tech specs and is in proximity to Columbus.

I look forward to discussing your progress on this effort next month. Please feel free to call me (301 492-7981) or Ed Blackwood (301 492-7451) if you have any questions.

Sincerely,

(S)

Edward E. Legasey
