UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

6-19-78

MEMORANDUM FOR: R. A. Hartfield, Chief  
Licensee Operations Evaluation Branch

FROM: E. L. Jordan, Executive Officer  
for Operations Support, IE

SUBJECT: POTENTIAL ABNORMAL OCCURRENCE, TOLEDO EDISON CO.,  
DAVIS-BESSE UNIT 1, DOCKET NO. 50-346

IE recommends that the enclosed description of a potential abnormal occurrence, titled Diesel Generator Automatic Loading Sequence Failure, be submitted to the Commission for approval and publication in the Federal Register as an abnormal occurrence.

We have determined that this occurrence meets the criteria based on the premise that the occurrence represents a serious deficiency in management and procedural controls which resulted in a major degradation of essential safety-related equipment.

  
E. L. Jordan, Executive Officer  
for Operations Support, IE
