Docket No. 50-346

AUG 20 1969

Mr. Howard H. Waldron
U. S. Geological Survey
Engineering Geology Branch
Denver Federal Center
Denver, Colorado 80225

Dear Mr. Waldron:

In accordance with the understandings which were reflected in Secretary Udall's letter of March 20, 1964 to Chairman Seaborg, I am forwarding Volumes 1, 2 and 3 of the Preliminary Safety Analysis Report filed by The Toledo Edison Company and The Cleveland Electric Illuminating Company with their application for authorization to construct and operate the Davis-Besse Nuclear Power Station.

The proposed facility is to be located on the applicants' approximately 900-acre site on the southwest shore of Lake Erie, about twenty-one miles east of Toledo, in Ottawa County, Ohio.

Please review the enclosed volumes and let us have your comments on the geological aspects of the Davis-Besse Station site which might have a bearing on our safety review of the Davis-Besse Nuclear Power Station Unit No. 1.

Your prompt review and comments will be appreciated.

Sincerely yours,

Original signed by:
Roger S. Boyd

Roger S. Boyd, Assistant Director
for Reactor Projects
Division of Reactor Licensing

Enclosures:
Vols. 1, 2 & 3 of PSAR,
Davis-Besse NPS

cc: Mr. Dwight M. Lemmon
