ORDER DISSOLVING PREVIOUS "ORDER STAYING BOARD MEMORANDUM AND ORDER"

On April 18, 1974, the Board stayed its "Final Memorandum and Order on Petitions to Intervene and Requests for Hearing" dated April 15, 1974, because of a misunderstanding as to the length of time granted to Applicants in which to file a response to AMP-O's "Request for Reconsideration ..." filed April 3, 1974, in the Perry proceeding. Accordingly, the Applicants, pursuant to the extension of time granted, delivered their response on April 19, 1974, as directed by the Board.

The Board has reviewed the detailed response of Applicants. In reaching the decision issued in its Memorandum

hearing order
M

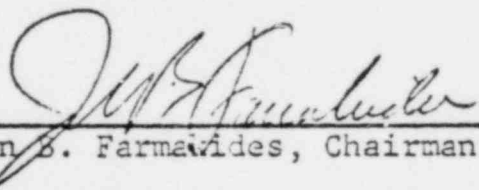

8002200 838

and Order of April 15, 1974, the Board had considered the points raised by Applicants insofar as they apply to this early stage of an antitrust proceeding dealing with petitions to intervene. While Applicants' thorough brief is appreciated, the Board is not persuaded that the Board's final Memorandum and Order should be reversed or modified.

Accordingly, the "Order Staying Board Memorandum and Order" dated April 13, 1974, is hereby dissolved. The Final Memorandum and Order on Petitions to Intervene and Requests for Hearing is hereby made effective as of this 23rd day of April 1974.

IT IS SO ORDERED.

ATOMIC SAFETY AND LICENSING BOARD

John B. Farmavides, Chairman

Issued at Bethesda, Maryland,
this 23rd day of April 1974.
