Docket No. 50-346

V. Moore, Assistant Director for Light Water Reactors Group #2, RL

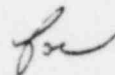

SAFETY EVALUATION REPORT: DAVIS-BESSE NUCLEAR POWER STATION, UNIT NO. 1,
QUALITY ASSURANCE

Plant Name: Davis-Besse Nuclear Power Station, Unit No. 1
Licensing Stage: OL
Docket Number: 50-346
Responsible Branch: LWR #2-3
Project Manager: L. Engle
Requested Completion Date: February 7, 1975
Applicant's Response Date: N/A
Description of Response: N/A
Review Status: Complete

Our evaluation of Toledo Edison's Quality Assurance Program for the operational phase of the Davis-Besse Nuclear Power Station, Unit No. 1 is enclosed. This evaluation is based on our review of the PSAR, as amended, and results of discussions with the applicant.

We conclude that the Quality Assurance Program as described in Section 17.2 of the PSAR (Amendment 24, Revision 10) for the Davis-Besse Nuclear Station complies with the requirements of Appendix B to 10 CFR 50 and is acceptable for the operational phase of the Davis-Besse Station, Unit No. 1.

Original signed by:
Richard H. Vollmer

Donald J. Skovholt, Assistant Director
for Quality Assurance & Operations
Division of Reactor Licensing
