STANFORD UNIVERSITY

Proposed Issuance of Order Authorizing
Termination of Facility License

The Nuclear Regulatory Commission (the Commission) is considering issuance of an order authorizing the termination of Facility License No. R-60 issued to Stanford University (the licensee), for the Stanford Pool Reactor located on the University's campus near Palo Alto, Calif., in accordance with the licensee's application dated August 9, 1976, as supplemented December 9, 1977.

Prior to issuance of any order, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By February 27, 1978, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the order in connection with the licensee's application. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to

matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or its acting board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application dated August 9, 1976, as supplemented December 9, 1977, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Dated at Bethesda, Maryland, this 18th day of January 1978.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors
Branch No. 4, Division of Operating Reactors.

VERMONT YANKEE NUCLEAR POWER CORP.
Issuance of Amendment to Facility Operating
License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 43 to Facility Operating License No. DPR-28 issued to Vermont Yankee Nuclear Power Corporation (the licensee), which revised the license and Technical Specifications for operation of the Vermont Yankee Nuclear Power Station (the facility) located near Vernon, Vermont. The amendment becomes effective 30 days after the date of issuance.

This amendment adds a license condition relating to the completion of facility modifications for fire protection. It also revises Technical Specifications to incorporate limiting conditions for operation and surveillance requirements for existing fire protection systems and administrative controls. Additional operating and surveillance requirements for the modifications being performed will be added to the Technical Specifications after the modifications are completed.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the
