POOR
ORIGINAL

Dear Sir,

I have been hearing a great deal about the Davis Besse Nuclear Power Plant being built to furnish electricity more cheaply.

I'm deeply concerned about the use of this method. I know we must have electrical power for our homes and businesses, but are you sure this is the best and safest way of obtaining it.

What effect will the radiation have on the public's health and the environment? What about our air, water, and land? We have enough pollution with^{out} the fear of radiation.

You're thinking of building a plant of this nature, when we have Plum Brook station already built. I would like to know why was it shut down? Why can't it be used for this purpose or is it unsafe. Thank you, for what help you give to enlighten me.
