NATIONAL SCIENCE FOUNDATION
SCIENCE EDUCATION DIRECTORATE
Program Review

Dr. Harvey Averch, Assistant Director for Science Education at NSF, will present the Science Education Directorate's Program Review at 2 p.m. on February 1, 1977, in Room 540 at 1800 G Street, N.W., Washington, D.C.

The Review discusses different strategies of Federal assistance used in science education over the last 17 years, and examines the performance of the present strategy in relation to expected conditions in the science education system. The Review concludes with an analysis of issues and options for science education.

The presentation is open to all interested parties, but due to space limitations, persons wishing to attend should call Myrna Wright, 282-7922, for a reservation.

HARVEY AVERCH,
Assistant Director,
for Science Education.

CONSUMERS POWER CO. MIDLAND PLANT, UNIT NOS. 1 AND 2

Availability of Draft Supplement to Final Environmental Statement for Midland Plant, Unit Nos. 1 and 2

Notice is hereby given that a Draft Supplement to the Final Environmental Statement prepared by the Commission's Office of Nuclear Reactor Regulation related to the continuance of construction of the Midland Plant, Unit Nos. 1 and 2, in Midland County, Michigan, by the Consumers Power Company, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C., and in the Grace Dow Memorial Library, 1710 West St. Andrews Road, Midland, Michigan. The draft supplemental statement is also being made available at the Office of Intergovernmental Relations, Department of Management and Budget, 2nd Floor, Lewis Cass Building, Lansing, Michigan 48909. Requests for copies of the Draft Supplement to the Final Environmental Statement should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

In March 1972 the Atomic Energy Commission (now the Nuclear Regulatory Commission) issued a Final Environmental Statement for the Midland Plant, Unit Nos. 1 and 2 (37 FR 7012) (copies of the FES (NUREG-0149) may be purchased from the National Technical Information Service, Springfield, Virginia 22161, at a cost of \$10.75 for printed copy or \$3.00 for microfiche). The purpose of this supplement to the Final Environmental Statement is to respond to the July 31, 1976 rulings of the U.S. Court of Appeals for the District of Columbia remanding to the NRC for further proceedings the Commission's orders granting construction permits for the Midland Plant, Unit Nos. 1 and 2. This supplement to the FES was prepared to assess energy conservation as an alternative to plant construction, to reevaluate the need for power in light of any changed circumstances concerning Dow Chemical Company's need for process steam, and to restrike the cost/benefit balance in light of these matters and the incremental environmental effects of nuclear waste disposal and waste reprocessing attributable to Midland. In addition, the staff considered whether any unanticipated significant adverse effects have occurred to date as a result of construction activities thus far.

Interested persons may submit comments on the Draft Supplement to the

Final Environmental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the draft supplemental statement (local agencies may obtain these documents upon request). Comments are due by March 7, 1977. Comments by Federal, State and local officials or other persons received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C., and the Grace Dow Memorial Library, Midland, Michigan. Upon consideration of comments submitted with respect to the draft supplemental statement, the Commission's staff will prepare a final supplemental statement, the availability of which will be published in the FEDERAL REGISTER.

Comments on the Draft Supplement to the Final Environmental Statement from interested persons or the public should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Rockville, Maryland this 13th day of January 1977.

For the Nuclear Regulatory Commission.

WM. H. REGAN, JR.,
Chief, Environmental Projects
Branch 2, Division of Site
Safety and Environmental
Analysis.

FLORIDA POWER & LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 11 to Facility Operating License No. DPR-67, issued to Florida Power & Light Company (the licensee), which revised the Technical Specifications for operation of the St. Lucie Plant Unit No. 1 (the facility) located in St. Lucie County, Florida. The amendment is effective as of its date of issuance.

The amendment revises the Control Element Assembly (CEA) Block Circuit surveillance requirements.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR
