Florida Power Corporation  
 ATTN: Mr. J. T. Rodgers  
 Assistant Vice President &  
 Nuclear Project Manager  
 P. O. Box 14042  
 St. Petersburg, Florida 33733

Gentlemen:

The purpose of this letter is to confirm our meeting for Friday, October 27, 1972, at 8:45 a.m. The meeting will be held in Room P-114 of the Phillips Building at 7920 Norfolk Avenue in Bethesda, Maryland.

It is our understanding that this meeting was requested by Florida Power Corporation to discuss the maximum surge level and coincident wave action for a probable maximum hurricane at the Crystal River site. The determination of this water level is necessary for completion of our review of the adequacy of the flood protection to safety-related equipment and structures for the Crystal River Unit 3 Nuclear Generating Plant.

As stated to Mr. Q. Dubois of your staff, we urge that you provide us with written material in support of your meeting presentation for our review prior to the meeting.

Please contact us if we can be of further assistance in arranging this meeting.

Sincerely,

Original signed by  
 R. C. DeYoung

R. C. DeYoung, Assistant Director  
 for Pressurized Water Reactors  
 Directorate of Licensing
