Mr. J. T. Rodgers  
 Assistant Vice President  
 and Nuclear Project Manager  
 Florida Power Corporation  
 P. O. Box 14042  
 St. Petersburg, Florida 33733

Dear Mr. Rodgers:

In June 1974, the Commission published Regulatory Guide 1.79, "Preoperational Testing of Emergency Core Cooling Systems for Pressurized Water Reactors," describing an acceptable test program for ECCS.

It is our position that Florida Power Corporation should describe their provisions for meeting Regulatory Guide 1.79 relative to Crystal River, Unit 3.

Our position, as stated above, is consistent with actions being taken for other facilities.

The licensing project manager, Mr. L. Engle, has already discussed this matter with you by telephone on June 13, 1975. At your request, a meeting has been scheduled for July 1, 1975 where the Florida Power Corporation can discuss Regulatory Guide 1.79 with the NRC staff. The meeting will take place at 1:00 p.m. in Room P-110 of the Phillips Building.

Please be ready to inform us of your schedule for implementation of Regulatory Guide 1.79 at the July 1, 1975 meeting. Please contact us if you have any questions concerning these matters.

Sincerely,

POOR ORIGINAL

Original Signed by

A. Schwencer, Chief  
 Light Water Reactors Branch 2-3  
 Division of Reactor Licensing
