PRELICENSING ANTITRUST REVIEW--FLORIDA POWER CORPORATION

Florida Power Corporation has just signed a contract for its steam supply system in connection with Florida Units 1 and 2 and plans to come in with its application for CP in January 1975. The applicant expects to submit the antitrust information at the end of July or early August.

The proposed schedule will provide antitrust information approximately five months before the CP application rather than the preferred nine month period. Hopefully this will not pose a significant problem since the Department of Justice has provided us with antitrust advice in connection with the Company's Crystal River Plant and should be able to complete its review in a relatively short time.

James Delaney, Economics Branch OAI is assigned as project leader for this application.
