

Docket Nos. 50-302  
and 50-303

MAR 4 1968

Florida Power Corporation  
101 Fifth Street South  
St. Petersburg, Florida 33701

Attention: Mr. J. T. Rodgers  
Nuclear Project Manager

POOR ORIGINAL

Gentlemen:

This refers to your application for construction permits and facility licenses which would authorize the construction and operation of two nuclear power reactors at the Company's site located in Citrus County, Florida.

We are transmitting a copy of the United States Fish and Wildlife Service Report containing comments and recommendations on both radiological and non-radiological effects on the proposed facilities for your information. Copies of this report are also being sent to appropriate state and local officials. The radiological safety aspects of this report will be considered in the analysis of the safety of the project by the regulatory staff and by the Advisory Committee on Reactor Safeguards. Our conclusions will be included in the safety evaluation we will prepare for the public hearing which will be held to consider the issuances of the construction permits.

We call your attention to the recommendations made by the Fish and Wildlife Service. We note that your application (at Section 2.7; 8/19/67) reflects your general plans for conducting pre-operational radiological surveys. The reports which you will submit on the results of the pre-operational surveys will be evaluated by the Commission and transmitted to the Fish and Wildlife Service at the time we consider your application for provisional operating licenses in this proceeding. The reports of surveys made after operations have begun will similarly be reviewed.

As you know, the Commission has no jurisdiction with respect to the non-radiological matters referred to in the Service's report. However,

we wish to call these matters to your attention in order that you may have the benefit of the Service's recommendations concerning potential non-radiological effects upon the environment .

Sincerely yours,

Original Signed by  
Peter A. Morris

Peter A. Morris, Director  
Division of Reactor Licensing
