Consumers Powr Company
ATTN: Mr. Russell Youngdahl
Senior Vice President
212 West Michigan Avenue
Jackson, Michigan 49201

Gentlemen:

We have received your letter of April 18, 1972, which describes the status of construction of the Midland Plant at the present time and requests the Commission to consider authorizing (1) continuing the limited activities previously permitted by 10 CFR 50.10(b), and (2) retention of the exemption issued July 30, 1970, which authorized certain work on the containment and auxiliary buildings.

We understand that all construction effort at the Midland site has been suspended. In accordance with your request, we will hold our evaluation of the information contained in your letter in abeyance until you make a supplemental filing requesting resumption of construction activities. At that time we will evaluate the information submitted and prepare the determination and findings required by 10 CFR 50.10 (d) (2).

Sincerely,
