Dr Ernst Volgenau, Director
Office of Inspection and Enforcement
US Nuclear Regulatory Commission
Washington, DC 20555

NOTICE TO EMPLOYEES
DOCKET NOS 50-329 AND 50-330

In response to your letter request of April 15, 1977 concerning the posting of an enclosed notice at our Midland site, please be advised that we are taking action to post that notice, and it will be posted at the Midland site in accordance with your request by July 8, 1977. The reason for my delay in answering your request is that in discussions with our architect-engineer-constructor, Bechtel Power Corporation, we learned that they were developing a policy concerning the same subject, and I felt it would be appropriate for it to be posted together with your notice. Their policy has been developed and will also be posted by July 8, 1977. A copy of the Bechtel policy is enclosed.
