FACILITY LICENSE APPLICATION FILED BY THE CONSUMERS POWER COMPANY FOR
THE MIDLAND PLANT, UNITS NOS. 1 AND 2

I am forwarding a copy of a facility license application, including
Volumes I and II of the Preliminary Safety Analysis Report filed by
Consumers Power Company for the proposed construction and operation
of two pressurized water nuclear reactors, designated as the Midland
Plant, Units Nos. 1 and 2, to be located in Midland Township, Midland
County, Michigan. The reactors are each designed for initial operation
at approximately 2,452 thermal megawatts with a net electrical output
of approximately 1325 megawatts.

A Supplement to Section 2C of the Preliminary Safety Analysis Report
is also enclosed.

Please review the Preliminary Safety Analysis Report, and provide
Mr. C. A. Lovejoy, Office of the Controller, with your comments as
to the reasonableness of the first core fuel requirements for a
reactor of this design and power level.

Please send us a copy of your comments.
