NOV 22 1978

Maurice S. Reizen, M.D., Director  
Department of Public Health  
3500 N. Logan Street  
Post Office Box 30935  
Lansing, Michigan 48909

Dear Mr. Reizen:

The NRC is currently performing a staff review of the Final Safety Analysis Report on the Midland Plant Units 1 and 2. The NRC Office of State Programs has been requested by the NRC Office of Nuclear Reactor Regulation to verify and supplement certain off-site emergency planning information contained in the Final Safety Analysis Report (FSAR) for the Midland Plant Units 1 and 2.

It would be helpful to us if your Department, as lead agency for radiological emergency response planning and preparedness in Michigan, would review and respond to the enclosed questions. It would be timely if we could receive your response not later than January 5, 1979.

We thank you for your cooperation and welcome this opportunity to incorporate this information in the safety review process. If you have any questions concerning our request, please contact Mr. Harold W. Gaut of our office. He can be reached at 301-492-7210 (FTS 492-7210).

Sincerely,

original signed by  
Harold E. Collins
