

UNITED STATES OF AMERICA
ATOMIC ENERGY COMMISSION

1-6-72

In the Matter of)

CONSUMERS POWER COMPANY)

(Midland Plant, Units 1 and 2)

Docket Nos. 50-329 50-330

ORDER

The motion of Saginaw intervenors to reconsider the December 31, 1971 date for filing contentions, etc., with respect to the Applicant's Environmental Report is granted and Saginaw intervenors are directed to file such contentions, etc., no later than February 4, 1972, the due date of their contentions with respect to the Staff's Draft Statement (which date is not hereby extended). The Board deems it appropriate to express its unhappiness with the implications of the request and the stated response. We recognize that Counsel for intervenors are spread thinly over a number of cases; we have attempted consistently to schedule hearings and meetings of the Board as to time and place with that consideration in mind. (Since opposing intervenors' Counsel are located in Saginaw, Michigan; Chicago, Illinois; Washington, D. C. and Suffolk County, N. Y. it is hard to accommodate everyone at once). At times we have done so to the inconvenience of the Board

and of other Counsel. There are limits to the concessions which can properly be made. Unlike law suits the consequences of delay and postponement of this type of proceeding are potentially very serious. We will continue to try to accommodate hearing dates within reason but we cannot in good conscience regard participation in other proceedings to be a justification for not meeting deadlines. If Counsel are to continue to participate in more than one case at a time they simply must be prepared to make arrangements for handling the case load.

- 2. The motion of the State of Kansas for an extension of time to January 10, 1972 is granted.
- 3. The motions of Saginaw intervenors dated December 7, 1971 are denied. Motions 1 and 4 would require a radical reshaping of the system of review provided by the Atomic Energy Act. It may be that as has been suggested some participation by intervenors in the staff review process would be appropriate but this is not the time or the forum to re-write the rules. The Board would be disposed to deny 2 and 3 for the reasons suggested in the staff answer. In any event, since the motions pertain to Emergency Core Cooling Systems they are moot under the Board's order of December 22, 1971. Motion number 5 is denied on the understanding that the staff will furnish a list of documents in accordance with the undertaking in their answers to the motions.

4. The request by the Mapleton intervenors to have the technical members of the Board "disclose their technical qualifications to judge environmental issues" is denied. The request is without basis in law. The clear implications of the request would require that the boards be composed of "renaissance men" qualified in all branches of human knowledge, or that several hearing boards to hear questions in various disciplines would have to be convened. Whatever the requirements of the National Environmental Policy Act that agencies pursue an interdisciplinary approach may mean it cannot be construed to require the creation of separate boards to hear these questions.

FOR THE ATOMIC SAFETY AND LICENSING BOARD

Arthur W. Murphy, Chairman
