A

AGENDA ITEMS FOR JULY 8-10, 1980

MEETING BETWEEN

NRC AND SOUTH CAROLINA ELECTRIC & GAS CO.

The current overall onsite and offsite organization for Summer.

How the basic objectives of the February 25, 1980 draft "Criteria for Utility Management and Technical Competence" are met with respect to the offsite organization and resources, including the radiological protection organization.

The responsibilities of each offsite organizational element that is related to the management or support of operation of Summer.

The lines of authority and communication between these offsite organizational elements.

The lines of authority and communication between these offsite organizational elements and the organizational elements at the site.

The qualification and staffing levels of the offsite managers and technical staff.

The Independent Safety Engineering Group that is located on-site but reports to offsite management (May 13, 1980 Info. Report - SECY-80-242).

How the corporate official in overall charge of nuclear plant operations is actively involved in plant operational activities - i.e.: what oversight and management responsibility and activities he personally handles.

How operational experience from the Summer plant and from other utilities, the NRC, INPO etc. is obtained, reviewed and disseminated to plant operators.

How outside contractual assistance will be relied upon as technical or other support to operation of the plant.

The national standards and NRC regulatory guides that you use as criteria for your current offsite management and technical support staff.

Offsite organization and resources for managing the response to and recovery from an accident.
