

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

*acc*

JUN 30 1980

NOTE TO THE FILE

SUBJECT: PROPOSED EXPORTS OF BYPRODUCT MATERIAL AND COMPONENTS TO EXXON  
NUCLEAR FACILITY IN WEST GERMANY (XB001100 and XCOMO420)

Exxon Nuclear requested expeditious processing of two export license applications for the export of Californium-252 and one Fuel Rod Assay System to their West German facility.

Due to the urgent requirement for the byproduct material and the components, the normal 15-day waiting period before a license is issued was waived for these two license applications.

Marvin R. Peterson  
Acting Director for  
Export/Import and International  
Safeguards  
Office of International Programs
