

Nov 14, 1970

This resolution was not adopted
by District Two Michigan
Association of Counties. It may
be considered in January 1971

Two statements by a Concession Power
representative contributed to a lack
of confidence in the request.

One: — The temperature of the river
(Tittabawassee) will be raised
about 3°.

Two: The temperature of the river
will be raised 1°.

Why raise it all? The public rights
are steadily being degraded. Certainly
we need power but it necessarily
steadily degrades the environment.

Respectfully

J. J. Jones

Clinton County H
