Subject: Alpha-Omega Services Model 5979 Package
Docket 71-5979
Renewal Application

Gentlemen:

Certificate of Compliance No. 5979, Revision 2 for the Alpha-Omega Services (AOS) Model 5979 Teletherapy Cobalt Source Shipping Package expires on June 30, 1980. It is our desire to renew Certificate No. 5979 and accordingly the following are enclosed:

1. A check in the amount of \$150.00 for renewal fee as prescribed in 10CFR170.31.
2. Nine (9) sets of reduced consolidated descriptive drawings of the Model 5979 Package.
 - AOS #0090 General Arrangement
 - AOS #0091 Container/Transfer Cask
 - AOS #0092 Details, inserts (turrets)
 - AOS #0093 Details, overpack and pallet
3. Nine (9) copies of the Consolidated Application and Design Report.

Regarding Item (3) above, it is our understanding that you require a single document which consolidates the original application and all subsequent supplements referenced in the Certificate. The original application for the Model 5979 Package was a letter dated March 20, 1975. The only supplement was submitted May 28, 1975 in compliance with NRC's request and consisted of: 1) the package Design Report earlier submitted to the DOT, and, 2) procedural controls for the Model 5979 Package. The

enclosed Item (3), accordingly, combines all Certificate-referenced submittals into a single document. For your convenience, we have enclosed one (1) set of full-size consolidated drawings, Item (2) above.

We also request some minor adjustments to the renewed Certificate. Since AOS no longer ships unencapsulated ⁶⁰ Cobalt, reference to it in paragraph 5 (b) (1) is unnecessary and it may be deleted. Additionally, the reference to gaskets in paragraph (7) may also be deleted as this requirement arose from the shipping of unencapsulated cobalt material.

We trust that the enclosed is sufficient for renewal of Certificate No. 5979. If you or your staff have any questions on this application, please do not hesitate to call.

Respectfully submitted,

Elliot J. Beck, RT
Technical Services Manager
